Current information

Regensburg, January 12th, 2006

Press release:

The PETnology Forum Europe 2006, Munich, May 8th-9th, 2006, Holiday Inn Munich – City Centre

The 8th PETnology Forum will present itself with innovations and highlights as a top level information and communication platform. The combination of lectures, workshops and exhibition will give newest branche information and supports “**networking**” that in particular is highly appreciated by all delegates, either on a public level or in a confidential circle.

The approved organization concept will be expanded – new services will enrich the conference and give more opportunity for conversation and exchange of views. In this way the PETnology Forum will strengthen its pole position as a leading event for the European PET packaging and beverage industry.

- **New: Summit talk of the beverage packaging industry at the PETnology Forum**
Panel discussion with executives of the leading companies of the PET industry
- Top-class conference programme with lectures and workshops
- Exhibition

Core themes:

- Markets and market trends
- Future trends for PET for food and beverages
- PET materials and additives
- Biodegradable polymers (PLA) and products
- Packaging and closure developments
- FEM simulation for PET packaging development
- PET machinery
- PET recycling
- Aseptic filling
- „Go Asia“

Detailed information is available at www.petnology.com. The conference sites will be updated regularly. The conference brochure will be printed and distributed at the end of January.
